STADSPOORT

ASSET MANAGEMENT

Space for your plans.
Attention to your wealth.

Personal wealth management from €50,000.

Your wealth is connected to your business, your family and the plans you want to realise. We start with your story, then work towards an investment portfolio that fits your circumstances.

Investing involves risk. The value of your investment may fall.

The city and office in the film are an artistic impression. Our visiting address is in Baarn.

Your portfolio, professionally managed

With discretionary wealth management, you delegate day-to-day investment decisions. We manage your portfolio within an agreed mandate. Your goals, finances, knowledge, experience and risk tolerance define the framework. You retain visibility of how your investments develop.

Understand first, invest second

Our introductory conversation covers your goals, commitments and available wealth, as well as your knowledge, experience, risk tolerance and capacity for loss. Only then do we prepare a proposal. You have time to review it before deciding.

Risk is part of investing

Prices can fall. Interest rates, currencies, liquidity and concentration also influence outcomes. Diversification may reduce certain risks but does not prevent losses. We discuss losses you can afford financially and tolerate emotionally. Returns and capital preservation are not guaranteed.

General information. Not personal investment advice.

What costs are involved?

Costs may include the management fee, custodian charges and transaction costs. Investment instruments may also carry embedded costs. Total costs depend on your agreement, account and portfolio. Always ask for the complete cost breakdown.

Your individual fee proposal

Before you begin, you receive a personal fee proposal covering the management fee and other applicable costs. We explain how these relate to the structure of your portfolio.
